First Evening Edition.

ADDITIONAL FROM CALIFORNIA.

STATE OF THE COUNTRY.

STATE OF THE COUNTRY.

From the Alta California, Jane 16.

The condition and prospects of California, so far as her mineral resources are concerned, were never better than they are at present. Tales that appear almost fabulous reach us every day from all parts of the mining region, and the idea that the mines of California are nearly canasted, as some of the Atlantic papers have been speculating, I most conclusively falsified. Never since the first dis covery and working of the gold placeres of our State has there been such a general and uniform success as there appears to be now. Water has been introduced into nearly every portion of our mining districts by canals and discheding from the neighboring streams, so that the miners have a sure dependence, and are not obliged as formerly to spend a large portion of the year in piling up and gathering earth, to be kept till the winter rains should come before the gold could be extracted. Recent discoveries of great richness have been made, and new fields opened for the enterprise of miners and traders.

Agriculturally, our State is also prosperous. Much attention has been paid to the raising of wheat, oats, and barley, and flouring mills are being established in every portion of the State, turning out an article of flour assarpassed by any in the world. In some portions of the State the wheat has been affected with the smut, but this is by no means general, and she wheat crops of the present season will be much larger than it ever has been before. Of barley and oats it is confidently expected we shall raise a sufficient quantity to supply the demand for the next year.

The condition of trade in the interior is highly encouraging, ewing to low prices which have ruled for so long a time. Provisions and manufactures me in abundance,

sufficient quantity to supply the demand for the next year. The condition of trade in the interior is highly encouraging, swing to low prices which have ruled for so long a time. Provisions and manufactures are in abundance, which, together with the productions of the soil and the importations of breadstulls from abroad, have given our agricultural and mining population full supplies of every desirable article at most reasonable figures. Whilst the interior is in such a flourishing condition, the position of the mercantile community of San Francisco has undergone ne change, and the voice of complaint is heard as loudly as ever. Ships from the Atlantic ports continue to arrive laden with cargoes of assorted merchandise, and the storchouses, which for months have been filled to their utmost capacity, remain in the same condition. Patience has been the word of hope to the merchant for a long time; but, in spite of this hope of better times coming, and a cessation of importations, they are as far distant as ever. The voice of the commercial community remains unchanged in relation to the supplies necessary for this market, and a general condemnation of the wild and reeklers spirit of adventuring goods in unlimited quantities still continues.

In real estate transactions are not heavy, owing to the

less spirit of adventuring goods in unlimited quantities still continues.

In real cetate transactions are not heavy, owing to the present consideration by the Land Commissioners of the city titles. Property the title of which is perfectly good commands a high figure. The erection of fire-proof buildings in the heart of the city for business purposes is still going forward, with a prospect, before the close of the building senson, of a large addition to this close of desirable structures. On the outer limits of the city, both frame and brick residences are going up with rapidity, and the hills and valleys around bid fair to show a more populated appearance before the close of this season.

The harvest of small grain in the valleys near the coast has just commenced, but in the Sacramento Valley it is considerably advanced, and the new barley has already been offered in the market. The market is unstable on account of ignorance with regard to the crops. The frost has done a good deal of damage to the wheat in Trinity and Scott River Valleys, and the frost has affected a good many of the fields in the Sacramento Valley.

The fruit crop in the valleys south of the Bay will be very large and of excellent quality.

The State Jour and says that the Sacramento River has deposited twenty inches of loam on the Plain near Sacramento City during overflows within the last year.

The benes and teeth of a large animal (supposed to have been a mastedon) were found in Tholumne County, 12 feet below the surface of the cartb.

Near Rattles nake Bar, on a flat in Eldorado County, human skeletons were found 14 feet below the surface, under four different undisturbed strata of sand and gravel. The carth in one of the skulls contains a number of particles of gold.

The Indians in the South are very quiet. The manage-

gold.

The Indians in the South are very quiet. The management of Lient. Reale at the Tejon Reserve appears to be very successful. He has his Indians now preparing to harvest their large crops of more than they consume. The wild Indians from the rivers and the mountains are continually coming in, and so far all is weare. The Saperintendant is sanguine in his hope that he will be able to wean them from their barbarism; but we shall see. If there were no white men in the way he might possibly success.

there were no white men in the way he might possibly succeed.

In the north the sld difficulties threaten to break out afresh. A lot of Siskigon Indians were preparing to make an attack on a party of miners, and invited Shasta Bill, with his tribe, to join them. Bill refused. Some difficulties followed, and the Shasta killed two of Tipsy's men, took their scalps to the miners, and said they were the scalps of Tipsy and his son. There is some doubt yet whether Tipsy is dead, but Shasta Bill had at least shown his determination to be a friend to the whites, when he and a number of his tribe were treacherously attacked by some miners. Shasta Bill was killed, and his tribe declare that they will have revenge.

There has been of course a lack of incidents of fatal crime and accident. A Garman named Miller, who was living with an Indian woman, was accidentally shot and mertally wonneded by his shot gun in the hands of an Indian, near Moedy's Woode, in in Shaster County. Capt. Hammond Warfield, Deputy Sheriff of Marine County, was mardered by an Indian near Russian River. Warfield was born in Baltimere, and was laterly from Texas.

Extensive Forgeries—A Strange Tale.—On the night before last, Messrs. Burgoyne & Co. gave information at the Marshal's Office that led to the arrest vesterday morning of an Englishman named Edward II. Montefore, who is said to have attempted to commit a forgery on their Bank. He had presented a letter of credit for fifteen hundred pounds sterling, professing to have been drawn by Messrs. Juker. Torre & Co., of the city of Mexico, on Messrs. Burgoyne & Co., which was supposed to be a forgery. He had also a letter of credit foram in Panama on Adams & Co. for \$1,300, which was gonuine; but it is suspected that the letter to Panama, which professes to have been drawn by Sanford & Co., London, on Messrs. Adams & Co., was forged. The writing in the body of this letter has been compared with that supposed to be forged on Messrs. Burgoyne & Co., and proves to be exactly similar. The prisoner was bailed out by an English resident of the city in the sum of \$2,500, who says that he knows the prisoner to be the son of Sir James Montefiore, a celebrated Jawish resident of England, and believes him incapable of what is laid to his charge.

Later News from Kern River—Great Excitement.—Mr. Westcott urrived on Saturday from the new diggings on Kern River. From him and other gentlemen we col-

what is laid to his charge. [Alta Cal.]

LATER NEWS FROM KERN RIVER—Great Excitement.—
Mr. Westcott arrived on Saturday from the new diggings on Kern River. From him and other gentlemen we collect the following information:

The new diggings are situated some 3.50 miles from Stockton high up in the elevated region in the direction of Kern's Pass. The traveler follows the southern trail until be strikes Posey, beyond White River; thence he proceeds along an Indian trail (by which Frement came into California on his last trip) in a south-easterly direction. Kern River, where the gold has been struck, is a stream about as large as the Moquelumne. The flats forming its banks are represented to prospect richly, and of the whole adjacent mining country the same may be said. For twenty miles from where the miner strikes the diggings the road is very rugged; so much so that it is necessary to use pack-mules in the transportation of provisions, &c. Wagons are of no service.

Messre. Compton, Sanderson & Co. exhibited to us yesterday a package of dust which Mr. Westcott had washed from the surface of the earth. It is fine and smooth, and differs somewhat from the gold found in Mariposa. Our informant states that there is plenty of dirt that pays four cents to the pan, which is equal to 510 per day to the man.

At the present time there are only some 75 miners on Kera river, but it is expected that large numbers are on heir way thither. Great excitement exists throughout mariposa County respecting the new discovery, and many of the best citizens are preparing to go South.

As may well be imagined, the settlers of Tulare County—the Four Creek region—are in high glee. Kern river is only 60 miles distant from Visalia, so that they will shortly have a ready market for their produce.

There is no doubt that the reports from the new diggings are true in every particular. The gold regions seembles, in geographical feature, the region round Hangtowa, and extends over a vast area.

[San Fran. Herald.]

Our thanks are due to the Express Companies of Mesers.
Adams & Co., Berford & Co., and Wells, Fargo & Co. for prompt delivery of California papers.

THE SOUTH PACIFIC.

CHILL-Our dates from Valparaiso are to the 31st of day. On that day H. B. M. frigate Pique arrived from

Cilif.—Our dates from variantage are to the dast of May. On that day H. B. M. frigate Pique arrived from England in 85 days.

We notice with regret that The Valparaise Herald is about to be discontinued, owing to want of support. During the time it has been in existence it has furnished a vast fund of very useful information relative to Chili and the English reading population of that country, summaries of foreign news, both political and commercial, that must have been both valuable and interesting. We since the recreat its discontinuance.

must have been both valuance and interesting.

erely regret its discontinuance.

From Chili there is no political news.

On the 13th, a pretty sovere shock of an earthquake was felt, which lasted some seconds. The Ecko says, that some important projects are likely to occupy the attention of the approaching Legislature.

In San Francisco June 13, Mrs. E. L. Smith, of a son. In Marysville June 6, Mrs. F. A. Stembs, of a son. Dled.

Married
In San Francisco, May 23, by the Rev. B. Brierly, at the residence of the bride's father, Mr. Charles Hopkins to Miss Lucy S. Baker, second daughter of Col. E. D. Baker.
In San Francisco, May 31, by the Rev. F. Mooshake, Mr. Hieranymus Hegmann to Miss Durothea Schmaehle, both of San Francisco, A. Petaluma, May 29, by the Rev. Harvey Hadley, Mr. Charles Justus of Johnson's Ranch, Satter County, to Miss Chorlotte M. C. F., eldest daughter of John J. Liems of Fetaluma. In Maryetille, May 56, by the Rev. A. A. Dryden, Mr. G. A. Strickland to Miss Matilia Nash.
At the Swiss Commiste, June 5, by R. Kellersberger, Vice-Consul Henry Luchslunger to Miss Barbara Treichler, both from Swiftseciend.

Great preparations are being made for the exhibition of the products of Chile in September next.

Accounts of the Baurishing condition of the province of Valdivia have been received. The wheat crop is good and a rise is expected on the present price, namely \$3 per fances (of 153 lbs).

THE MARKETS.—Business for the last fortnight is reported as dull: all articles of merchandise appear abundant. The market is also well supplied with provisions except rice and coffee, which are scarce.

In exports, Flour has remained firm, owing to advices from San Francisco; and three ships are reported as taken up for San Francisco; to load at Concepcion, at \$7.30 per quintal and \$17.30 freight.

Beans, Hides and Wool are buoted as scarce. Copper figures at \$19.00 and \$20 on shore; Nitrate of Soda, small transactions, at 21 reals.

Freights have exhibited more activity, and we note the following: Ores, from Calders to Liverpool, 24 16 s to 25; Nitrate, from Iquique to Liverpool, 24 16 s and 5 per cent.: Ores, from Huasco to Boston, \$25; Wheat, from San Antonio to Melbourne, £5.15.

Shipping.—H. B. M. s ship Amphytrite arrived from Panama on the 14th May with treasure.

BOLIVIA.—From this Republic we have no direct news.

Pan.—From our file of The Lima Foreiga News we compile the following:

A sovere sheek of an earthquake was felt in Lims on the morning of the brig Splendid, while beating out of

Ireland.
In San Francisco, 8th June, by the Rev. A. Williams, Mr. Win.
Licert to Mrs. John Jones.
In Stockton, June 7, by Bishop Rip, Mr. R. K. Reid, Resident
Physician of the Insane Asylum, to Miss Martida, B. Mastera.
A. Benicia, June 3, by the Rev. Mr. Woodbridge, Mr. Thomas
Roberts of Stratford, Conn., to Miss. Mary A. Douglass of Columbia,
Tuolumne Co.

compile the following:

A severe sheek of an earthquake was felt in Lims on the morning of the 20th.

The Captain of the brig Splendid, while beating out of Callao Roeds, bound to Melbourne, was stabled in a scuffle with the man at the wheel and killed.

An Englishman named Hall, made a murderous attack on a Sr. Villegas and his little son, three years of age, the latter died, having received over a dozen stabs. The assessin was arrested. The affair is wrapt in mystery.

THE MINES.—The reports appear to be contradictory, as the following extracts will show:

NEWS FROM THE AMAZON.—We have just conversed with a gentleman (Mr. Caverly) direct from the Amazon.

Mr. C. brought two steamers—contracted for by this Government with Dr. Whitmore, some time ago—up the river, and delivered them to the authorities at Nauta. The steamers are named the Tiraio and Hauligga.

Mr. C. informs us that the advantages of the Amazon Valley have not been overrated. The choicest kinds of cabinet wood, spices, gums, &c., grow in rich profusion along the banks of the river—and nothing appears to be wanting to render the country one of the finest in the universe, but an infusion of a little energy and liberality into the Governments at present holding possession of it.

Our informant met a party of gold hunters at Moyobamba. They had received a letter from some one of Tablot's party, advising them to push on without delay, as the gold mines, so far from being the witho-the-wep which many supposed, were a fixed fact. The letter stated that Tablot's party were making from six to ten dallars per day, each man.

The best route seems to be by way of Huanchaco, Ca-

that Tablot's party were making from six to ten dellars per day, each man.

The best route seems to be by way of Huanchaco, Cajumarca, and Chachapoyas—striking off to the south-east from the latter place. The route by way of Moyomamba is said to be longer and more difficult to travel.

Dr. Manford, just arrived from the interior, gives rather an interesting account of the country through which he passed. He left here in company with some forty others, about a month ago, on a prespecting tour. They experienced no trouble until arriving at the River Canachamayo, to the eastward of the Cordilleras. At this point they were met by a body of Indians who disputed the passage—showering arrows upon them as they attempted to cross. The Indians, however, were driven back, losing many of their number, and our informant and his party entered their country, where the white man has not been allowed to set his foot since the time of the Spanish conquest.

tered their country, where the white man has not been allowed to set his foot since the time of the Spanish conquest.

HARD FORTURE.—On the 11th of April last a company of foreigners left this city for the Puzuzu Valley, on a gold-hunting excursion. They numbered twenty-five—all strong, able-bodied men, well equipped, and in the best health and spirit. On Monday last, nine of the party returned, after placing two of their comrades under the sod, and leaving fourteen others sick on the road—eight at Huann-co, and six twenty-two leagues from that place. The party spent some in prospecting for gold, and after a careful search found but two pieces. They ask us to warn others from taking the same route.

The News of the 3d gives the following list of persons who left Lima on the 1st for the Amazon:

Wm. F. Henrietta, John D. McCaffery, Thomas B. Woodruff C. B. Arcularius Fisher C. West, S. G. Hatch, Thomas W. Whitehead, C. Sheidman, E. J. Smith, Wm. Richards, Joseph Stickeney, William Carroll, M. Kerrins, Thomas McHennon, Fred. Barkes, Charles Archibald, Jno. Blakely, George Andrews, J. Warren, George Ottaway, Albert McCov.

The same journal of the 10th says: We conversed yesterday with an old California friend, who has been living for the past six months in Cachabamba, Belivia. He is now on his way to the United States—being satisfied, as be says, with a cannitry which offers so few inducements to foreign settlers as Boivia. From our informant's statements we judge that the present administration will be of short duration. Belzu is represented as a conceited, ignorant man, whom the people are extremely auxious to be rid of. It is only by an arbitrary, cruef course of government that he has retained his position for so long a period. A conspiracy against him was formed in La Paz in February lest, which would have been successful had it not been for the treachery of some persons engaged in it. The Bolivians are said to be kind and hospitable, though extremely superrelificus and bigoted.

of arms, to mule loads of ammunition, 250 horses, and \$6,000 in cash, to enable him to prosecute the war to advantage.

An intercepted letter from one of the rebel officers to a Frenchman named Larrieu—Castilla's confidential agent—states that the revolutionists have a force of six thousand well-atmed men, and that they will soon be reinforced to the number of one thousand more. The writer says that there "will be fighting very soon at the gates of Linn.

The late movements in Taca and Puno, in favor of the Government, have been quelled. Two non-commissioned officers have been executed in consequence.

From Demningo Edins disembarked from the steamer Linns, at lquique. Don Domningo, it will be recollected, was the first mover in the rebellion.

The forces of Puno, to the number of 1,200 men, under the orders of Gen. San Roman, were, at last dates, on the morch for Cozco.

The news on the whole, may be considered decidedly unfavorable to the Government. If, as stated above, G.s., Castilla can bring into action a force of from 5,000 for 7,000 men, well armed and equipped, the revolutionary question may be considered at an end.

A report was circulated in this city a few days ago, to the effect that Gen. Vivanco had given bis adhesion to Government. Gen. V. is still in Arequipa, watching the movements of beth parties. He is, no doubt, more favorably disposed towards himself than to any one else, just at this time, and his influence will probably be unfelt for some time to come—though there is hardly a question that he will use if at the proper moment to secure his own advancement. Such is the conclusion to be arrived at after reviewing his course for the past few weeks.

Gen. Vivanco was the unsuccessal opponent of Gen. Echenique for the Presidency, 31 years ago, and was ban siled to Chile by the latter soon after the election. To expect him to throw the weight of his immense induced in favor of one who sent him into exile, would certainly be giving him credit for greater magnanimity than most people possess. Chipper ship Union, hence at Sau Francisco, off Cape Horn, was
bearded by a heavy sea, which carried away head rail and billet. be giving him credit for greater magnanimity than most people possess.

By a private letter received from Paita, we learn that on the 5th of June the Government troops, 130 in number, under the command of Colonel Trias, had a sharp battle with the revolutionary party, 230, under the command of Obario, near Macacara. The fight lasted nearly two hours, when Obario retreated, leaving Trias master of the field. About 25 were killed altogether. The steamers Purimac and Caupolican arrived the same evening with nearly 600 Government troops, who were landed immediately, and marched for La Huaca under command of Goacaral Moran. The steamers above mentened are still in pott. Bay sair. Quadratus, Finley, Oregon

Memoranda.

Chippership Union, hence at San Francisco, off Cape Horn, was bestered by a heavy sea, which carried away head rail and billethead, stove cutwater, &c., which caused the ship to leak belly making 12 to 15 inches per hour, both pumps going every hour for 70 days. Crossed the Equator May 18, four 189, and have had light toutherly winds most of the time after.

Clypte, ship Whiriwind, hence at San Francisco, was off Cape Houn 22 days in heavy westerly gales. Crossed the equator May 18th, lon. 18, and had light toutherly winds most of the time after.

Clypte ship Whiriwind, hence at San Francisco, was off Cape Houn 22 days in heavy westerly gales. Crossed the equator May 18th, lon. 18, and had light two the cape split sails, etc.

Clipper ship Challergor, at San Francisco, made the run from Boston to Cape Horn in 29 days. Was off the Cape 19 days in light weather. Crossed the equator May 19, fon. 14, in 24 days from the Cape, and carried fresh north-reast winds to lat. 31 N, after which time had strong northerly winds. Was 24 days from the equator May 18 days from the equator may san francisco. C. Wilson, seaman, fell from the main topsail yard and was drovered.

Glipper ship Tingous, at San Francisco, was 20 days from Philedelphia to the Equator on the Atlantic, and 22 days from its 23 saround Cape Horn, having been detained 19 days between the Straits of Magellan and the Straits of Le Maire, during which time experienced strong case of years for San Francisco, at a dearfied the north east trades to lat 31 N. Was off San Francisco is days in thick fore and light winds.

Ship North Carolina beace at San Francisco, experienced surver gales from north west to south well was 26 days in coming around Cape Horn. Was as for south as 26 20. From the 17th of Mar, lat 48 S., lon. 19 W., te the 12th May, lat. 24 35, ion. 129 W., test repairs which time experienced variable winds.

Stemmer Peytona damaged her propellor off Port Orford, 18th ut., and was chilged to lash it fast

AUSTRALIA.

By the arrival of the steamer Golden Age at Panama in as days from Sydney, we have Australian advices to May 11, six weeks later than our daies by way of England. The Panama Star gives the following memoranda of the

The Panama Star gives the following memoranda of the vovage and summary of news:
Steamship Gelden Age, D. D. Porter, U. S. N., Commander, arrived at Panama f.om Sydney, via Tahite, on the 19th of June, at 6 A. M. She left Sydney May 11, and arrived at Tehite on the 2tth: termined in that port six days, taking on board 1,200 tana coal, and sailed thence on the 31st for Panama, making the peasage from Sydney in 38 days, including stoppages. The first part of the voyage was made against strong head winds, and for the entire passage to Panama she had a current against her equal to 74s miles. From Tahite, so smooth was the sea, and so mild the passage, that a cance might have come the entire distance in safety. The Golden Age brings 11s cabin passengers and 00 in the atterage, and would have been filled, but numerous misrepresentations of difficulties in crossing the 1sthmus.

in crossing the Isthmus.

The following is a memorandum of the run of the Golden

Agestuce leaving New-York, using naces:	but 12	of her 16	iar-

cal or 2071 English miles per day. The Golden Age has never stopped her engine at sea since leaving New-York, and has neither in hull nor machinery met with the slight-est accident during this voyage round the world. She has never been idle since arriving on the coast of Australia, having been constantly employed running on that coast while her coals were being shipped to Tahita. At Tahita every facility was offered by Gov. Page and the French authorities for her quick dispatch. At Tahiti the following vessels were in port and about to sail:

Am. bark Gay Head, for Beston: Br. ship Caspar, Capt. Eldra, for Valparaiso: Br. ship Hopewell, Capt. J. G. Sugme, for Chincha Islands: Br. ship Governor Morris, twhaier, no oil.; on a cruise; bark Esther Frances, Capt. Crocker, for San Francisco.

The Golden Age brings \$200,000 in specie and gold dust; also, mails for England and the United States, allouisigned to Mr. J. M. Freeman of this city.

Our detes by the Golden Age are from Melbourne to the 5th, and Sydney to the 11th of May.

Malbourness.—From The Argus of the 4th, which contains a summary prepared expressly for the Golden Age, we compile the following:

The Post Office declined sending a mail for Europe by the Golden Age, in consequence, as is stated in an official notice, "of the heavy charges levied for carriage across the Isthmus of Panama. Mesers, Adams & Co. shouse, therefore, with their usual energy and regard for the public convenience, opened a bag for awapapers at a moderate charge, to cover the expense of transportation.

The yield of gold still continues enfouraging. The smoont brought down by the Government excert averages about 40,000 onness a week.

The aveint shout the supply of food is relieved by the

amount brought down by the Government escort averages, about 40,000 ounces a week.

The anxiety about the supply of food is relieved by the knowledge that the stocks in South America and the United States are abundant, and the course of trade not likely to be disturbed by the war.

The Argus advocates the policy of investing English capital in public improvements in the colony.

Labor is still scarce and high, and servants of every description are in active demand.

In the political world there was but little stir.

The new Governer, Sir C. Hotham, had not yet arrived.

rived.

The price of gold is quoted at £3 19 per ounce.

The warlike news from England had effected the money market. The banks had advanced the exchange on London from 3 to 5 per cent., and the rates of discount to 7 per cent. on short bills, and 8 per cent. on bills over three

ger cent. on short bills, and s per cent. on bills over three months.

SIDNEY.—The Empire of the 10th Contains a summary of news since the sailing of the Chusan in March last.

The Governor-General was still absent on a visit to the northern districts. The papers complain that tag Galliope, the only vessel of war for the defense of the port in case of a Russian attack' should be engaged by the Governor at the present time. Considerable alarm is said to be felt. The subject of organizing a volunteer corps was under consideration, and slight fortifications were being run up at the entrace of the harbor as fast as possible, with the limited means at disposal for that purpose.

Mr. Henry Parkes of The Empire, were elected by a large majority, for the representation of Sydney, over Mr. Kemp, late of The Moravilg Herald. This was considered as a strong popular manifestation of the public opinion against the principles of the new Constitution bill.

The yield of gold is about the same as usual, namely, 1,000 ounces per week. Some fears are entertained about transmitting to England under the risk of war; the insurance offices are demanding war risks.

Business is still flat, and stocks are so heavy that no immediate rise is expected. The bank has raised the rate of discount to 6 per cent.

An action was brought by Capt. Fitz Roy, Aide-de-Camp, and son of the Governor-General, against the editor of The People's Advocate, who charged him with cheating at cards. The Court awarded 223 damages each, which amount was raised by public subscription in Syoney.

A postscript announces that the Calilope, with the Gov-

each, which amount was race. Sydney. A postscript announces that the Calliope, with the Governor-General on board, was jest entering the bay.

STATE OF THE MARKETS TO-DAY.

ASHES -- A steady Market for Pearls at \$5 50 and Pots at

COTTOX—The market is firm with an upward tendency.
FLOUR AND MEAL—The market is better for the lower and inferior grades of Western and State Flour, but the better grades are heavy and less active. Canadian Flour is scarce, and prices are nominal at \$7 \$\$7 25. The sales of Western Canal are 4,500 bbls. at \$6 44 \$\$7

for common to good State, \$5.75 2 \$6 for "Bogus State," \$7.25 2 \$6.775 for common to good Ohio and \$7.25 \$7.25 for Wilscensin. Southern Flour is without change; sales 300 bbls. at \$8 50 @ 89 for mixed to good brands Baltimore, noted.

sinces is light. A sample of new North Carolina Wheat is on the market, being the first of the season. Rye is inactive at \$1 15@\$1 18. Barley is quiet at 95@\$1. Oats are lower and in good supply; sales of State and Western Com is 25 5c, better and is active; sales 60,000 bush, at

ts a 64c. for unsound, 65 2 68c for Western mixed, 74 2 75c. for Scuthern yellow, and 80 a 83c. for Southern white; the latter searce and wanted.

latter reasec and wanted.

WHISKY—The market has improved, with a good demand; sales 200 bbbs, at 27 a 27 lc. for Prison, and 27c. for

PROVISIONS-The market is heavy for Pork, particularly Mess, with small sales of Mess at \$11, and Prime at \$10@\$10 25. Beef is without change; sales of repseked Chicago at \$16; Country Mess at \$12@\$13, and City Mess at \$15 50. Lard quiet at 9 294c. Butter and Cheese

BY TELEGRAPH TO THE NEW-YORK TRIBUNE LARGE FIRE AT LUBEC, MAINE.

LARGE FIRE AT LUBEC, MAINE.

Extrour, Monday July 10, 1834.

A large fire occurred at Lubec at 2 o'clock yesterday merning, consuming Fowler's plaster mills, a store, six dwelling houses and two vessels. The loss is estimated at \$100,000, only about \$12,000 of which is supposed to be covered by insurance. The Etna Company of Hartford, loses \$3,000. A house containing 300 kegs of gunpowder was saved with great difficulty.

XXXIIID CONGRESS........FIRST SESSION.

SENATE Washington, Monday, July 10, 1854. Mr. SHILDS presented a memorial from the Icarian So-ciety of Illinois praying for a grant of land in Iowa of which to make a settlement, the same to be paid for after

which to make a settlement, the same to be paid for after relection and settlement.

Messrs. CHASE and SUMNER presented memorials from Connecticut, Ohio and Massachusetts, for the repeal of the Fugitive Slave act. Referred.

Mr. HUNTER introduced a bill to reduce and graduate the price of public lands, and for other purposes. Laid on the table.

Mr. MALLORY introduced a bill to establish a Marine Research at Academics.

Mr. MALLON1 introduced a but to establish a Marine Hospital at Apalachica.

Mr. MASON, from the Select Committee on the subject, reported a bill fixing the number and the salary of the employees of the Senate.

The bill making Tuscumbia in Ohio, a port of delivery was then taken up and passed.

The Civil and Diplomatic Appropriation bill was received from the House and referred to the Financial Com-

The House bill authorizing the survey of certain Indian traces in Microsofts, was taken up and passed.

The bill for the construction of a line of Telegraph to the Pacific was taken up.

Mr. HAMLIN offered an amendment, providing for pensities upon operators or others for divulging any message transmitted by Government. Adopted.

HOUSE OF REPRESENTATIVES.

WASHINGTON, Monday, July 10, 1854.

The SPEAKER laid before the House a communication from the Tressury Department concerning memorials asking for the erection of buildings in California for the use of the Custom House Appraisers. Referred to the Committee of Ways and Means. Committee of Ways and Means.

The House then proceeded to vote on the motion of Mr. CULTIS to suspend the rules, in order that he might report from the Committee of Accounts the joint resolution to fix the compensation of the employee in the legislative department of Government, and prohibit the allowance of the extra compensation to such as receive the benefits thereof

thereof.

While the Clerk was calling the House Mr. JONES (Tenn.) rose and said this was not the same resolution as Mr. Curtis heretofore had asked leave to report, it having heen interlined since so as to embrace the publick folders.

Mr. CURTIS said he did not interline it. He had no DAY BOAT for ALBANY, stopping at the usual ght to do so. It was the resolution as printed that he Landings. The well-known and favorite steamer ARMENIA
